Solar Private Limited

Pump your Pump with Solar Energy

Bill of Material:

- Solar PV Modules
- Solar Pump Controller
- Mounting Structure
- MC 4 Connectors
- AC / DC Cables
- AC submersible pump
- HDPE Pipe

Solar Water Pumping System

In villages till now, water is pulled out for drinking or for irrigation from well or hand pump or submersible pump running through electricity or diesel. Pumps running on electricity make life easier, but not all villages have electricity in India yet. However, we can always take benefit of the plenty of energy available from the Sun.

Solar Water Pump System is a long-term, sustainable and economic solution to the water problem of agriculture in India.

Available in 1 HP, 2 HP, 3 HP, 5 HP, 7.5 HP and 10 HP capacity

Benefits of Solar Water Pumping Systems

- No dependency on any fuel or Conventional sources
- Save Electricity Board connectivity charges
- Easy & Low Maintenance
- High Life expectancy
- Powered by clean, re-usable energy
- Start working from early in morning to late evening
- Works with traditional AC pumps

Why Sanelite

MANUFACTURER OF QUALITY SOLAR PANEL/PV MODULES.

EMPANELLED CHANNEL PARTNER OF GEDA AND MNRE

EXPERIENCED & KNOWLEDGEABLE TEAM OF EXPERTS

COMMITTED TO QUALITY PRODUCTS & SERVICES

24 x 7 SERVICE & SUPPORT

Corporate Office

209, Shanti Mall, Sattadhar X Roads, Sola Road, Ahmedabad - 380061, India.
